Hi Ron, can you convert the attached m4a file to a MP3 for me? I wish they'd loop you in, it would get online faster.

Apparently there's no file editing on this one, just convert to MP3.

Thanks.

Jeff Morin

Attached is audio, photo from the press event and text to send out as well as post on the website.

Jeff - We need this to look exactly like it did for the Durango press event posting yesterday.

Danny – once approved please send these tweets with the attached photos.

Please confirm these are approved.

From @EPA: [@GinaEPA](#) gives an update to press on #AnimasRiver response efforts in

Farmington, NM. Joined w rep. Lujan.

From @EPA:.@GinaEPA meets with local officials and water quality managers in Farmington NM.

SUBJECT: Statement, Photo & Audio from EPA Administrator Gina McCarthy in Farmington, NM

Today, EPA Administrator Gina McCarthy began her day with a meeting with Navajo Nation President Begaye and his leadership team. This included a tour through the Navajo Nation and survey of the San Juan River.

McCarthy also visited the Farmington, NM, Incident Command Center and hosted a press availability. She is meeting with mayors, officials from the San Juan Water Commission, and visiting the Aztec Emergency Response Center.

Audio: Audio from EPA Administrator Gina McCarthy's remarks and press conference at the Animas River Hike and Bike Trail in Farmington, NM on response efforts relating to the release of waste water from Gold King Mine.

At 11:20 AM MT, Administrator held a press briefing at the Animas River Hike and Bike Trail in Farmington, NM. The following remarks can be attributed to EPA Administrator Gina McCarthy:

The agency and community are making significant steps forward in the Farmington, NM area. A significant positive step was announced yesterday that showed that water quality for the Animas River from the Silverton, Colo. area to the Durango municipal water intake has returned to pre-event water quality levels. These results are based on validated sampling data collected from Aug. 5 to Aug. 9, 2015.

We are committed to helping the people throughout the Four Corner Regions who rely on these rivers for their drinking water, irrigation water and recreation. We know how important it is to them. We have stood up a Unified Command Center in Farmington and Durango, as well as the Emergency Operations Center at EPA headquarters in DC to ensure a seamless coordinated response in collaboration with local, state and federal officials.

In New Mexico – we will have new data soon and we will put it in context for local decision makers, so they can make the most informed decisions regarding the on-going use of water resources.

Regarding irrigation, EPA issued a \$500,000 work assignment on Monday for the delivery of water for irrigation and livestock in New Mexico. This service was previously being provided by San Juan County, NM and we are making deliveries. We understand the importance of the irrigation systems and are providing data to local jurisdictions to make informed decisions.

EPA is here to take responsibility, we are seeing the river restoring itself and we are working through issues to ensure that it is cleaned up. We are in this for the long haul.
